

Calderwood

This detached house was originally constructed in 1965 and is located on a suburban street close to the centre of Bath. The clients bought the property with the desire to upgrade and extend the accommodation to suit their growing family. The new alterations have a minimal impact on the front of the house, instead providing a dramatic transformation of the living spaces at the rear and improving their connection to the garden.

This has been achieved by extending outwards and to the side which, with the removal of the existing external and internal walls at ground level, creates a generous open plan living space. An additional bedroom at first floor was also provided and the rest of the house was refurbished to provide a thoroughly modern and more energy efficient living environment.

Location: Bath

Client: Private

Structural Engineer: Momentum Engineering

Builder: Spiller Builders

Status: Completed 2012
